Met Office Aberdeen Meteorologist's View

Freezing level mainly above the summits so a continued slow melt of snow will enhance already full watercourses and very soggy ground conditions. Some low level flooding is possible. Severe gales on the tops during the afternoon, a few storm force gusts likely in the early evening.

Maximum wind: South or southwesterly 40-45mph with gusts 50-55mph

Chance of cloud free mountain/hill tops above 800m: 90% generally cloud above the summits but there may be some patches below 800m at times especially around any passing showers.

Visibility: Generally good or very good visibility throughout the day, perhaps dipping moderate in showers.
